

SEA-EU INTENSIVE COURSE

Secrets of the Amber

The Intercollegiate Faculty of
Biotechnology of the University of
Gdańsk and the Medical University of
Gdańsk & The Faculty of Biology

04-06 July 2022

The University of Gdańsk is pleased to invite students to take part in the unique workshop on the secrets of the Baltic amber. Amber, a golden droplet of a fossilized resin found not only in the sea, has been accompanying the humans for ages, piquing their curiosity and interest. Its beauty inspires artists, while its history and distinctive features fascinate the scientists. Known as “the gold of the North”, amber has been one of the most desirable trade goods of the Baltic Sea cities.

University
of Gdańsk

TARGET STUDENTS

The initiative is designed for students of all disciplines. Participants will be awarded 2 ECTS points (depending on the individual decision of home university).

PROGRAMME

The course will be held in-person in Gdańsk and will last 3 days.

Program consists:

- An exploratory expedition to hunt for amber
- Amber workshops in a molecular and paleontological laboratory
- A walk in “amber forest” in the Museum of Amber Inclusions at the University of Gdańsk
- A visit to the Amber Museum in Gdańsk

REGISTRATION

The limit is 2 students per each SEA-EU partner university. The participants will be selected on a 'first come, first served' basis. The deadline for registration is June, 20.
