TOPIC OF THE INTERNSHIP

- Scientific context of the internship (max 20 lines)

The WONDERCOINS projects inaugurate in Spain, Portugal and Morocco a research line of digitization and creation of a web platform of ancient numismatic finds with a known provenance in Hispania and Mauretania, emphasizing those finds with an archaeological context. This line of research was born internationally from the outset, given the scope of the project and its online nature. One of its objectives is to expand the internationalization of its results as much as possible, for which the translation of its contents into English, French and Portuguese is essential.
